Nonprofits Achieving More, Together

ARIZONA TOGETHER FOR IMPACT

The Arizona Together for Impact Fund supports nonprofits as they create an enduring future through collaboration.

WHY WE EXIST

We **BUILD** knowledge, capacity, and resources related to sustained collaboration.
We **ELEVATE** sustained collaboration locally and nationally.
We **FUND** sustained collaborations that help nonprofits realize their missions, increase impact, and grow capacity.

WHAT WE DO

We believe in sustained collaboration. At every level, in every sector, collaboration is a catalyst for innovation, an igniter for positive change, and a means to do more good work together than we ever could alone.

Grants from Arizona Together for Impact can facilitate, fund, and support strategic, sustained collaborations. Whether program partnerships, back office consolidations, asset transfers, or organizational mergers, these new relationships transform organizations by activating deeper mission impact and increasing resiliency — strengthening the entire nonprofit sector and our communities.

Available resources include:

- Confidential advice on the process and resources
- Funding for initial discussion, exploration, and implementation phases
- Access to tools and research to support collaborative efforts
- Workshops and speakers to learn more about sustained collaboration

There is power in going beyond organizational boundaries and doing together what we may not be able to do alone.

WHO WE ARE

Arizona Together for Impact is a funder collaborative, modeling the vision of partnership and sustainability in the community. We believe that through providing resources to explore and implement sustained collaborations we can support nonprofits to realize their missions, increase their impact, and grow capacity.

Arizona Together for Impact is part of the national Sustained Collaboration Network. Comprised of similar collaborative funds around the country, the network is a nationwide movement with one goal: Helping nonprofits, large and small, get the help and support they need to collaborate. Dedicated to bringing technical support, tools, and funding to nonprofits, we can make an otherwise daunting strategic option seem accessible.

Since our inception in 2019, over 20 funders across Arizona have collaborated with the Together for Impact Fund to commit approximately $2.5 million to create and facilitate collaborative opportunities.

From smaller-scale collaborations like a shared space or joint programming, to large-scale alliances and organizational integrations, we work with organizations on an individual basis to discover the best path forward. The resources we provide to help cover the costs of expert facilitation and other third-party expenses honor organizational culture and mission alignment.
